## NEW ART COLLECTION

### «Together, let's imagine your signature iconiccube.»

Aroundthecube has introduced the first fully-printed Rubik's cube 10 years ago. Our continued quest for innovation and originality brought us to introduce the iconiccube.

A different type of canvas especially conceived with artists and illustrators in mind.

A new genre on its own offering a multitude of possibilities to express and convey artworks and illustrations which transcends certain limits of art that will certainly leave an indelible mark in the world of design may it be on the iconiccube itself, the iconicbox, the iconicapp or "the puzzle piece of art"!
